Director of Public Affairs

11 March 2026

General Code of Business Conduct

- Under no circumstances should Members exchange information on any competitive parameter.
- Information to be exchanged shall be limited to that necessary to accomplish implementation of the LightingEurope policies.
- Any Sensitive Competitive Information shall be provided, if necessary, only to an independent third party offering satisfactory guarantees of confidentiality.
- Every meeting between Members shall have a specific, demonstrable purpose.
- Any contact between Members shall be for a legitimate purpose only.
- Any violation shall be seen as a serious breach and shall be severely sanctioned.

Open day – housekeeping rules

- Comments and Questions are welcome at any time. Please indicate to whom your question is addressed.
- Slides will be made available on our website.
- Please give us your feedback on this event – [here.](#)

Our Speakers today **Elena Scaroni**

Elena Scaroni is LightingEurope's Secretary General, appointed in June 2023.

She served as Policy Director since joining LightingEurope in September 2016, advocating the interests of the European lighting industry in the recent ecodesign and energy labelling regulations for light sources.

Before LightingEurope, she spent eight years in European affairs at Enel, a multinational energy company. Her responsibilities included managing relations with the European Parliament.

She studied in Rome and Paris and holds a master's degree in law, specialising in European Affairs.

Our Speakers today **Teresa Selvaggio**

Teresa Selvaggio leads and coordinates LightingEurope's internal work on sustainability, ecodesign, and labelling.

She brings over 15 years of experience in EU policies and public affairs. Before joining LightingEurope in September 2023, Teresa worked in the European Institutional Affairs and Funding team of a major company in the energy sector.

Prior to that, she served for five years as Policy Advisor to a Member of the European Parliament.

Teresa holds a Master's degree in European Studies, which she recently complemented with a postgraduate Master's in International Politics.

Influencing legislation on key files for the Lighting Industry

WGs Sustainability & Sound Product Rules

Influencing the future Ecodesign and Labelling rules for lighting

Review clause of current Ecodesign Regulation*

- Repairability
- Lifetime
- Energy efficiency requirements
- Lighting controls
- Quality (Stroboscopic and flickering)
- Control gears
- Dimming
- Stand-by power
- CRI
- Exemptions

Ecodesign for Sustainable Products Regulation (ESPR)

- Digital Product Passport
- Substances of Concern
- Unsold consumer goods
- Critical raw Materials
- Recycled Content

**Article 9 of Regulation (EU) 2019/2020*

We are working towards clarification and simplification of current rules

LightingEurope's requests on PFAS (forever chemicals)

- Did you know that the EU could potentially ban all products containing PFAS, including lighting products?
- If you do not request an exemption for your specific product type, your products may be automatically banned.
- Do you think your products are covered by LightingEurope's requests? We are now updating our list of products for our industry
- Only you know the specifics of your products and can properly defend why an exemption should be necessary

Our request to have luminaires included in the EU TAXONOMY

We are calling for the **inclusion of manufacturing of controllable LED-based luminaires** in the EU Taxonomy as a sustainable activity.

Unlocking the Potential of Smart Lighting: Including Luminaire Manufacturing in the EU Taxonomy's Climate Delegated Act

Our request in a nutshell

LightingEurope believes that it would be beneficial for both the environment and the industry if manufacturing of controllable LED-based luminaires - for both indoor and outdoor applications, such as road lighting, pedestrian and cycle lane lighting, among others - were explicitly mentioned as an enabling activity for Taxonomy Climate Change Mitigation and Adaptation.

Such inclusion would incentivise the market to accelerate the transition to smart lighting solutions, driving substantial energy savings. It would also ensure fair conditions for manufacturers of all efficient lighting equipment.

Introduction

In its current version, the Delegated Act of the EU Taxonomy, which establishes the Technical Screening Criteria (TSC) for determining when an economic activity qualifies as contributing substantially to climate change mitigation or climate change adaptation, only partially covers the manufacturing of lighting products under activity "3.5. Manufacture of energy efficiency equipment for buildings". Specifically, in this section the manufacturing of light sources and of presence and daylight controls for lighting systems are explicitly mentioned among the economic activities that can be Taxonomy aligned.

The current wording in the Regulation, as described above, does not provide full clarity on the classification of the manufacturing of all lighting products in the EU Taxonomy for climate change mitigation and adaptation purposes, which has created some uncertainty in the market.

This paper explains the reasons why we recommend explicitly recognising the manufacturing of controllable LED-based luminaires as an enabling activity under the Taxonomy Climate Change Mitigation and Adaptation. It also includes our proposed amendments to the legislative act.

Link to our position paper [HERE](#)

Ensuring a swift implementation of the new Packaging provisions

The Packaging and Packaging Waste Regulation (PPWR) introduces stringent new requirements on **packaging design**, **reuse**, and **labelling**.

We build coalitions with other industries along the packaging value chain to ensure:

- EU Waste sorting labels which avoid fragmentation
- Exclusion of pallet wrappings and straps from reuse targets
- Timely guidance from the Commission to enable compliance

We support our members in tracking regulatory developments and preparing to comply with the new requirements, through webinars and guidance documents.

Influencing the upcoming Circular Economy Act

CEA key objectives:

- boost demand and movement of recycled&circular products
- increase supply of high-quality recyclates
- keep precious materials in the EU.

This includes revision of WEEE Directive

Our key points of attention:

- Harmonisation of rules across Member States
- Enforcement
- Expanding producers' responsibilities
- Definition of clear "end-of-waste" criteria

Our work:

- Internal TF Waste and TF Remanufacturing
- We are in the Waste Expert Group of the Commission
- Tight cooperation with other EEE producers and Eucolight

Bringing harmonisation outside the legislative framework

Driving harmonized LCA rules for the lighting sector

OUR ACTIVITIES

PSR 0014 for luminaires (PEP Ecopassport)

Technical Memorandum for Control Gears (published)

Technical Memorandum for Light Sources (soon to be publishes)

Accompanying companies towards compliance with new requirements & in decarbonisation journey

Empowering Consumers for the Green Transition

Application from September 2026

- Expands the scope of what counts as a “misleading action”
- Prohibits making misleading/generic environmental claims

LEGAL GUARANTEE

Minimum two-year legal guarantee protection for goods sold in the European Union.

Consumers can claim their rights under the legal guarantee of conformity, for example if goods:

- do not match the description;
- do not function as intended.

Sellers are liable for any lack of conformity which existed when the goods were delivered, and which becomes apparent within the legal guarantee period. Sellers in such a situation are required to offer:

- free repair or free replacement;
- in some cases, a price reduction or full reimbursement.

What to do if you receive non-conforming goods:

- Contact the seller as soon as possible to report the issue;
- Provide proof of purchase, such as a receipt, invoice, or bank statement.

europea.eu/youreurope/guarantees

GARAN

Sellers and producers may also offer commercial guarantees, which apply independently from the legal guarantee. For example, you may see this GARAN label representing a **commercial guarantee of durability** offered by the producer at no additional cost and covering the entire good.

How can LE help you?

LIGHTINGEUROPE
THE VOICE OF THE LIGHTING INDUSTRY

How can LE help you?

Become a member

How to apply

Criteria to Become a Member

You need:

- To be a manufacturer of lighting products or components of lighting products with offices in at least a country of continental Europe
- To be a member of one of the national lighting associations (unless no relevant association is a member – then 50% increase will apply)
- To have significant R&D activity (no pure importers)
- Only the company ranking highest in the group becomes member

You need:

- An association representing lighting manufacturers at national level in Continental Europe (no regional associations allowed)

Become a member in 2026

A form has to be filled and signed, indicating:

- the European lighting Turnover for companies,
- the Turnover of your members for associations,
- the correspondent Fees, and
- the Working Groups or Group where you want to contribute to.

Membership Fees in 2026 – Try our simulator based on our new Bylaws

If you are a national association

The screenshot shows the 'Membership Fee Simulator' interface for a national association. At the top is the LIGHTINGEUROPE logo with the tagline 'THE VOICE OF THE LIGHTING INDUSTRY'. Below the title, there is a 'Type:' dropdown menu set to 'Association'. Underneath is a 'Turnover Amount (in millions):' input field containing the number '232'. A green 'Calculate' button is positioned below the input field. At the bottom, the result is displayed as 'Estimated fees: €8620.00' in green text.

Turnover does not include export to other countries

If you are a company

The screenshot shows the 'Membership Fee Simulator' interface for a company. At the top is the LIGHTINGEUROPE logo with the tagline 'THE VOICE OF THE LIGHTING INDUSTRY'. Below the title, there is a 'Type:' dropdown menu set to 'Company'. Underneath is a 'Turnover Amount (in millions):' input field containing the number '232'. A green 'Calculate' button is positioned below the input field. At the bottom, the result is displayed as 'Estimated fees: €43440.00' in green text.

Only European Turnover is relevant
